MEDIA RELEASE

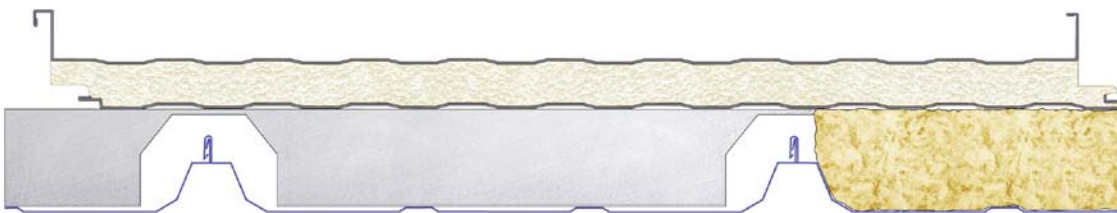

## Metl-Span Signs Licensing Agreement with Roof Hugger, Inc.

Metl-Span, Lewisville, TX has entered into a licensing agreement to distribute Roof Hugger's patented sub-purlin systems.

Doug Pickens, VP of Marketing, stated this is an exciting venture for Metl-Span that plays a key role in our expansion into the retrofit market and our "Green" Building commitment. Utilizing our highly energy efficient insulated roof and wall systems, MetlSpan can be considered the proven retrofit alternative for building owner's who need to substantially increase their building's thermal performance.

Roof Hugger, Inc. is equally excited to work with MetlSpan. Mark James, VP Sales & Marketing, for Roof Hugger said this is the first time that a components manufacturer has provided metal-over-metal retrofit systems like these. Existing metal buildings that are often under-insulated can now be upgraded to meet new energy saving requirements.

Metl-Span pioneered many of the developments of insulated metal panels and continues to make significant contributions to design innovations and technology that shape industry standards. For more information on the complete line of Metl-Span products, call 877-585-9969 or visit [www.metlspan.com](http://www.metlspan.com).
